**IV. Story Scene**

- A. *"Yeah. I'm not looking forward to being out of energy and on bedrest for four months," Jess sighed.*  
*"You're not alone, Mrs. Debán. Other folf carrying mothers go through the same thing, even the wolf mothers. It's not your fault, completely normal," Dr. Benson said.*  
*"Good," the doctor said. "Do either of you have any questions?"*  
*"Can I still fuck her?" Matt blurted, followed by Jess thwapping him on the head.*  
*"Intercourse is okay as long as you don't tie to her. Your knot is already a tight fit for her species and it can cause premature labor," Dr. Benson chuckled, not surprised by the question. Matt held Jessica's paw in his and rubbed it, looking back at the bulky monitor.*

Notice the clawtips. That's how big she is in the picture.

*Jessica is in this. Though she's sitting up, topless. Matt is sitting in the chair. Jess is swatting at him for the question. The tigress doctor is snickering at the question. No blanket.*

*Dr. Benson. Unfinished sketch stage.*
