

I. Description

- A. You're taking the silver dragon and having him fucking the leopardess described in this file.

II. Background & Angle

- A. Use the 3D render to go off of. The leopard spotted sheets are strewn, white undersheets and mattress. The pillow is also in a leopard pattern and is on the bottom of the pic but it's hard to tell. Maybe a split screen or action box angle?

III. Positioning

- A. Copy hentai reference. Make it spicier if possible.

IV. Characters

- A. Alkalide
i. Silver dragon. 7' tall. Muscular, but not overly so. Black fleshed cock (14"). Four foot wing span, cock same proportion as sketch.
B. Tera Bravehart
i. Leopardess, 5'11", brown eyes, white hair, C cup.

section of room to use. Pondering angle change.

Positioning to use. Yeah. This was the only good part of the movie. The story (and animation in most cases), like 99% of the hentas I've seen are total crap.

Tera Bravehart

Krahnos © his player. Picture © FoxxFire. Best reference I could find. Alkalide is basically this. Ivory horns, silver scales, black fleshed, sheathed, cock.
