

The fennec is finally giving birth. Put it in a different temple chamber. Have her squatting, with Anubis behind her. Have his uncut, erect cock floating around in view. Have the fennec on the last series of pushes, and make her squat over some kind of birthing 'well' indented into the floor. Have the fennec's breasts visible. Add the birthing goddess Taweret behind the fennec, opposite of Anubis, helping things along with the birth. Have the fennec's expression be painful/tired. Only a few more pushes left. As for the hybrid, it doesn't need to be too graphic. Simply showing it being pushed into the indented well in the floor is enough.
