Wikipedia: The South China tiger is one of the smallest tiger subspecies. Male tigers measure about 2.6 m (8 ft) from head to tail and weigh about 150 kg (330 lb). Female tigers are smaller, measuring about 2.3 m (7½ ft) long. They weigh approximately 110 kg (240 lbs). The short, broad stripes of the South China tiger are spaced far apart compared to those of Bengal and Amur tigers.
